# How to get the smile of your dreams

[www.sloandental.co.uk](http://www.sloandental.co.uk)

Love your smile >

## Love your smile

### SMILE WITH CONFIDENCE

**It shouldn't feel embarrassing to smile. It isn't necessary to feel bashful or ill at ease when you look back at your photos of special moments.**

Every week the team at Sloan Dental meet people who don't love their smile.

**Maybe you're uncomfortable when you smile in public?**

**Maybe you simply want to look your best in your wedding photos or at another special event?**

**Perhaps you are approaching a significant birthday and feel in need of an image overhaul?**

We love to help our customers fall in love with smiling again. It isn't as intrusive or as expensive as you might think. Using modern techniques in cosmetic dentistry you can have the smile you want in as little as three months.

### Look your best

**The team at Sloan Dental are very experienced in helping people to smile.**

**We have helped more than 250 people achieve the smile they desire.**

# How do you create a perfect smile?

Perhaps you have seen the fantastic results that cosmetic dentistry can have on a friend or family member or maybe even in a celebrity magazine, but aren't sure whether it could work for you?

## The answer is it probably will.

The new brace systems we use are super easy to fit, cause no discomfort and have great long-lasting results. It is more than likely that by fitting one of these systems you will be able to achieve the look you want.

“ IN UNDER FOUR MONTHS MY SMILE HAS BEEN TRANSFORMED. I AM LOOKING FORWARD TO GETTING MARRIED WITH A SMILE I CAN BE PROUD OF.”

- SARAH (33)

## A few questions >

Understandably, many of our customers have concerns when they first begin talking to us about their desire to “fix their smile”. Here are some of the questions we get asked a lot.

### Will it hurt?

**No**, not at all. The fitting and removal process is completely pain free.

### Will it feel odd?

It may take you a day or so to get used to them, but usually when we make our follow-up phonecall on day one our customers tell us they are used to them already.

### Will it affect the way I speak?

**No**.

### Can I eat and drink as normal?

**Yes**. Some of the older systems did require you to avoid certain types of food, otherwise they could be discoloured. However, the new systems we use don't have this problem.

### Does it cost a lot?

**No**. Our prices start from £1400. You don't have to pay this all at once; we usually arrange for monthly payments throughout the course of your treatment. We can also arrange for you to spread the payments over ten months with an interest-free credit agreement (subject to finance approval).

# How long will it take?

## The smile you want

The vast majority of our patients achieve the smile they want within six months.

For some, the treatment is effective in as little as four months - the fastest success we've had took just seven weeks. For some, it can take a little longer - maybe up to nine months.

**“ WAS REALLY CONCERNED THAT MY NEW BRACES WOULD CHANGE THE WAY I TALK - BEING A SCHOOL TEACHER THIS IS A MASSIVE ISSUE! NIALL ASSURED ME THAT MY SPEECH WOULD BE OK AND HE WAS RIGHT. THE BRACES HAVE ONLY BEEN ON FOR A FEW WEEKS AND ALREADY I CAN SEE MY TEETH GETTING STRAIGHTER”**

- HELEN (38)

BEFORE

AFTER

## What happens after six months?

You will have been having regular monthly appointments with us, so you will know how the treatment is progressing and when you can expect for the braces to be removed.

Once you are satisfied with the results of the treatment, the braces are then simply and painlessly removed - and you can enjoy your new smile with confidence.

# How do you create the perfect smile?

It is a simple procedure to fit the braces. It takes around 25 minutes to fit them.

“ **IF YOU NEED A DENTIST THIS IS THE PLACE TO BE! STAFF ARE FRIENDLY AND HELPFUL AND PUT YOU AT EASE. NOTHING IS TOO MUCH TROUBLE FOR THE STAFF”**

- CATHERINE (44)

## Call us

The first step is to call and arrange a consultation with Niall Sloan, our lead dentist.

## Consultation

Your first appointment with us will be a consultation that will take around forty minutes. During this time, we will discuss what you want to change and talk about the treatment options. If we decide we can help, and you want to go ahead, we will take photos, X-rays, and models of your teeth.

## State of the art

We take a 3D scan of your mouth using the revolutionary iTero scanner to show you a 3D image before and after to show how good your smile can look!

## Manufacture

Depending which system we have decided upon, your braces should be made for you in the manufacturer's labs within two weeks, based on the models we took during your consultation process.

## Fitting

It takes approximately twenty-five minutes to fit your new braces. We will discuss the upkeep and aftercare and arrange for your first follow-up appointment.

## Whats next?

A little adjustment to your teeth cleaning routine & regular monthly appointments to check your progress.

### Phone call

We will call you 24 hours after your braces are fitted to make sure everything is ok and you are feeling comfortable.

### Regular appointments

We will arrange a fifteen to twenty minute appointment each month, so we can check the movement of the teeth, see how you are getting on and make any adjustments to the braces that are necessary.

## Removal

Approximately six months later, it will take around twenty-five minutes to remove the braces. You can enjoy your new improved smile.

## Aftercare

You will need to wear a retainer at night to ensure that you keep your wonderful new smile. We will keep an eye on things with regular checkups every four to six months; the equivalent of your normal dental checkups.

**That's how you create a perfect smile**

## Smile & effective

It really is that simple!

# Which system is right for you?

At Sloan Dental we offer three different types of treatment

## CFAST

The CFast system is similar to the “six month smile” programme. The braces are fixed to the teeth. They are not completely invisible, but they are virtually invisible. They will work on eight teeth. They can be used on the top and/or bottom row of teeth.

## INMAN ALIGNER

This is the fastest of all treatments. However, it only works on the front four teeth. It is more intrusive than the CFast system because it is not fixed. The patient will be responsible for wearing the brace, so you need to be particularly motivated to use this system.

## CLEAR ALIGNERS

Clear aligners are completely invisible. They are the most expensive of the three systems we offer and they are the slowest. They will work on up to six teeth. They can be used on the top and/or bottom row of teeth.

During your consultation appointment, we will assess your teeth, discuss your lifestyle and your goals with you and recommend the best system for you.

Why wait?

**I HAVE ALWAYS WANTED TO HAVE STRAIGHTER TEETH, BUT NEVER THOUGHT MY SMILE COULD LOOK THIS GREAT SO QUICKLY. PLUS, NO ONE EVEN KNEW I WAS WEARING THEM. I AM SO HAPPY - THANKS NIALL!"**

- LOUISE (25)

# Straighten your teeth with Invisalign®

## The process is quick and simple

Invisalign® Clear Aligner Dental Brace help you to get straight teeth quickly without the ugly, bulky braces of the past.

Thankfully, most people will be unable to tell you are wearing Invisalign® Clear Aligner Dental Brace at all.

## Invisalign: the barely there brace

Invisalign works like a normal brace but are much less noticeable and more comfortable to wear. Unlike traditional braces that many of us have had, it is made from plastic and is similar in appearance to a dental retainer that is usually worn after the removal of metal braces.

The plastic brace is comfortable to wear due to its malleable material and is made specifically to work with the shape of your teeth. This is done by using a 3D scanner (**Sloan Dental are the only practice in Lanarkshire and Renfrewshire to use this amazing technology**) and x-rays to ensure that the brace is a perfect fit.

As Invisalign braces are removable, it makes eating much easier and omits the chore of having to brush teeth after every meal like you would with metal braces. It is recommended that you keep your braces in for 22 hours a day and clean them regularly as instructed by your dentist.

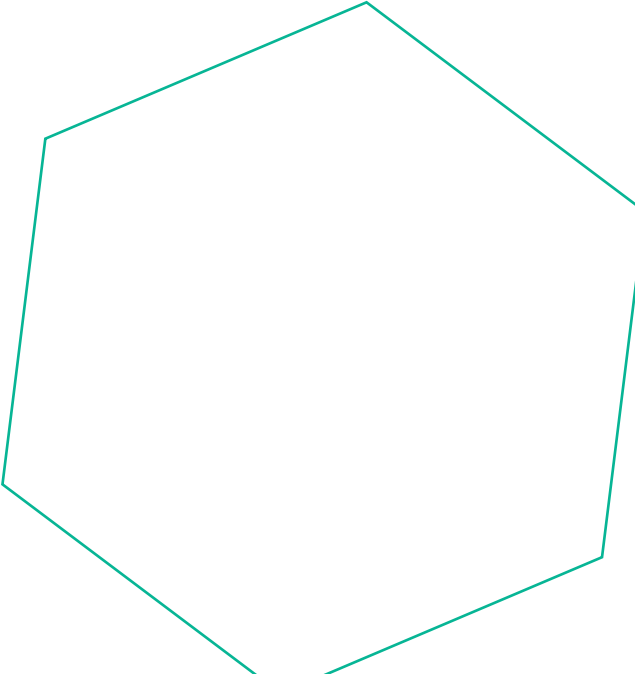

## A gift for you

### **ACT NOW & GET FREE TEETH WHITENING WITH YOUR SMILE TREATMENT**

Thank you for your interest in our cosmetic dentistry services. As a special thankyou for your interest, we would like to offer you a free whitening treatment - worth £270 - when you complete your smile perfection treatment.

## About Sloan Dental

The team at Sloan Dental loves to help our customers smile with confidence. We are leaders in cosmetic dentistry - including rapid teeth straightening treatments.

### A word from our lead dentist, Niall Sloan

**PEOPLE ARE ALWAYS SURPRISED HOW EASY THIS TREATMENT IS. FOR ME, AS A DENTIST, IT IS VERY REWARDING TO HELP PEOPLE GET THE SMILE THEY WANT. THROUGHOUT THE TREATMENT PROCESS, I NOTICE MY PATIENT GROWING IN CONFIDENCE. EACH TIME THEY COME IN, THEY ARE SMILING MORE AND NOT COVERING THEIR MOUTH SO MUCH WHEN THEY LAUGH. IT IS REALLY SATISFYING TO BE PART OF THAT"**

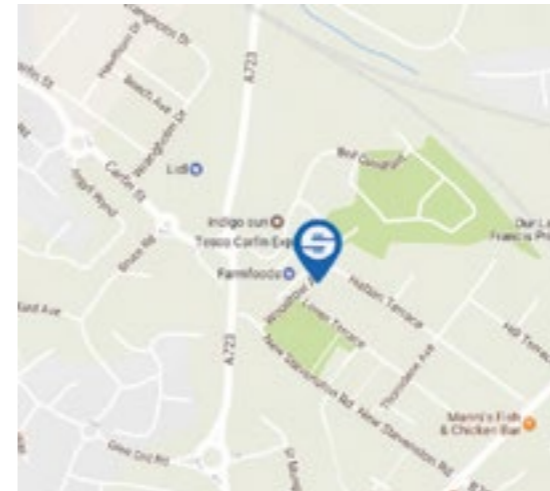

Each year we help around fifty people get the smile they desire. Men, women, young and not-so-young. For a special event, for a pre-birthday treat, to feel happier looking at photographs, taking selfies or simply to feel more confident and happier with their smile.

Would you like to be one of them?
